

The process begins, when an order is received.

Afterwards, one of the following branches is executed:

- It is silent transition 1ed.
- The storehouse is informed and the department is engineeringed.
- Subsequently, the process is split into 2 parallel branches:
- Next, it is prepared for assembling.
- Latterly, it is silent transition 2ed.
- Thereafter, it is silent transition 3ed.
- Once all 2 branches were executed, the bicycle is assembled.
- After that, the bicycle is shipped to the customer.
